TrboDVR Server™

FOR

MOTOTRBO™

Professional Digital Two-Way Radio System

Record voice traffic and eliminate control stations.

TrboDVR **Server**™ provides a powerful solution that allows you to acquire all incoming data from MOTOTRBO™ Digital Two-Way Radios without the need for control stations.

● Does not require control stations.

● Requires network connectivity at the repeater site(s).

● For use with Single Site and IP Site Connect Systems

● Three configurations optimized for specific uses:

TrboDVR Silver enables connection of MOTOTRBO radios to StreetTrek, StreetTrek3™, StreetTrek Explorer™ and Simple Text Messaging™ clients.

TrboDVR Gold incorporates features of TrboDVR Silver with the addition of Simple Email Gateway™.

TrboDVR Platinum incorporates features of TrboDVR Silver and Gold with the addition of voice logging and recording.

● Voice Recording Features:

Record all voice traffic and store in a highly compressed format to easily archive.

Easily search saved recordings and play streaming audio.

● HotSOS web service integration available.
